

I should already know:

- a variety of common wild and garden plants, including deciduous and evergreen trees
- the basic structure of a variety of common flowering plants, including trees

Plants

Biology

Vocabulary

seed	Part of a plant which can grow into a new plant.
germinate	When a seed begins to grow.
Reproduce	To create a new living thing.
Seed dispersal	When seeds are spread, to grow away from the adult plant.

By the end of the unit I should know:

- how seeds and bulbs grow into mature plants
- how plants need water, light and a suitable temperature to grow and stay healthy.
- how plants have adapted to live in different habitats.
